Summary

I am Tamagn A versatile, hardworking individual; driven to meet or exceed a company's expectations to deliver high-quality software products. Experienced in Java, JavaScript,php, phyton ,node, ,react,SQL, mongoDB, and Postgress. An effective listener that can communicate technical information in an easily understandable way. Offers a strong background in creative problem-solving and a proven ability to multi-task and prioritize in fast-paced, stressful environments.

Experience

Highlight software   dec 2023- present
backend developer

 https://www.remotide.com

As a backend developer at Highlight Software Company, I significantly contributed to the development and maintenance of critical features for the remotide.com . My responsibilities included implementing robust backend functionalities, designing and optimizing database schemas, and ensuring seamless integration with front-end components.

- Led the development of RESTful APIs using Express.js and MongoDB, enhancing the platform's scalability and performance.
- Successfully integrated authentication and authorization mechanisms using JWT (JSON Web Tokens), enhancing the platform's security features.
- Implemented error handling and validation techniques to ensure data integrity and improve the user experience.

Education

Arbaminch university   june 2020- present
software engineering   regular
3.7
